

spytech software: powerful PC surveillance solutions

Contact: ceo@spytech-web.com Website: www.spytech-web.com

"30 to 40% of Internet use in the workplace is not related to business." -- IDC Research

"70% of all Internet porn traffic occurs during the nine-to-five work day." -- SexTracker

"37% of workers say they surf the Web constantly at work." -- Vault.com

netvizor: centralized network surveillance

NetVizor is the award winning network monitoring and supervision solution that your network needs! NetVizor gives you the power to log all keystrokes, websites visited, windows viewed, applications ran, internet connections made, passwords entered, chat conversations that were made, and even capture screenshots of the user's activities! NetVizor allows you to centrally monitor and control machines on your network from one location. Remote realtime administration, monitoring, and tracking of users on a network has never been easier

NetVizor is the most comprehensive solution for monitoring a network from ONE LOCATION - all powered by an extremely easy-to-use graphical interface!

Activity Recording:

- Keystrokes typed
- Websites Visited
- Windows used
- Internet Connections Made
- Applications Ran
- AOL/AIM/Yahoo/MSN/ICQ Chats
- Documents viewed and printed
- Screenshots of user actions

Content Filtering:

- Block unwanted websites/keywords
- Restrict specified applications

Remote Control:

- Control Running Processes and Windows
- Browse the Remote PC's files system
- Shutdown/Restart/Logoff the Remote PC
- View the Desktop and user actions in realtime

NetVizor runs invisible to the user in total stealth and cannot be detected. Keep tabs on your network user's activities - at any time - from one central location.
