spytech software: pc surveillance and security solutions

Contact: ceo@spytech-web.com   **Website:** www.spytech-web.com

Specializing in security and privacy solutions for the everyday PC user and business, Spytech was founded in 1998. Spytech takes pride in delivering award winning software solutions and services to its customers.

Spytech has been an active solutions provider since 1998. Since then Spytech's flagship product, SpyAgent, has grown to be one of the most widely used PC spy software solutions in the world. SpyAgent's success has led to the development of a host of monitoring solutions tailored for specific user environments - from corporate networks to homes.

---

realtime-spy: monitor any pc from anywhere

Realtime-Spy is the latest in cutting-edge computer monitoring technology that allows you to monitor ANY PC from ANYWHERE. Realtime-Spy is remotely deployable (no physical installation needed), and its activity logs are accessible from anywhere - regardless if the remote PC is online or not.

spyagent: pc monitoring and content filtering

The number one solution for award-winning, powerful PC monitoring and surveillance needs. Logs all keystrokes, applications, windows, websites, internet connections, passwords, chat conversations, and even screenshots. Perfect for monitoring others who use your PC - children, spouses, or employees.

netvizor: centralized network monitoring

NetVizor is the latest in powerful network surveillance. Monitor your entire network from one centralized location! NetVizor allows you to track workstations and individual users that may use multiple PC's on a network.
Combined with real-time remote surveillance and individual user monitoring, NetVizor is the most comprehensive network monitoring solution available!
